

Wellness AI:

Keeping Universities Open for Learning

What part of the equation are you **missing** in your Covid efforts?

Existing Data Sources

Make your data work harder. From mobile apps to contact tracing efforts, Wellness AI pulls it all together.

Kiosks

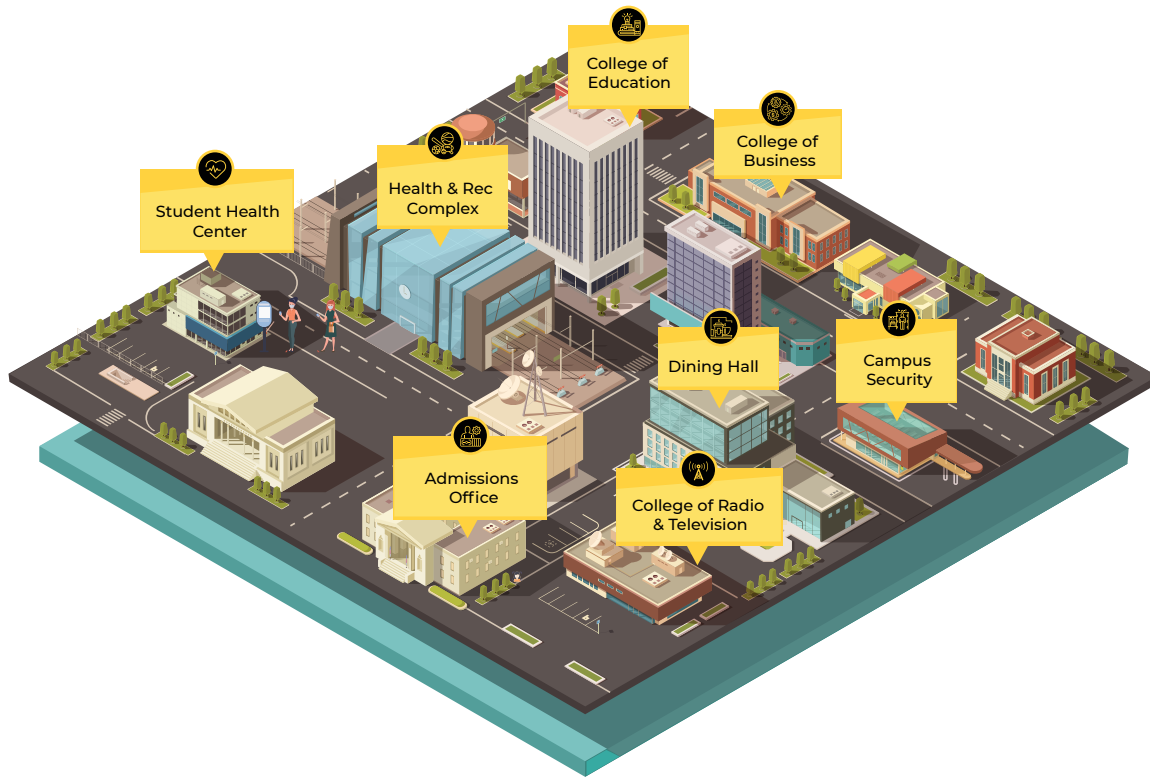

Installing kiosks in high traffic areas allows the university to capture and monitor additional data.

Intelligent Dashboards

Integrating existing data with new information collected from kiosks provides a more holistic view and allows for real-time decision making.

Kiosks installed throughout campus **provide important data**

Wellness AI data insights **drive better decision making** in areas like:

Contact Tracing

Enables tracing of all users in case of exposure/infection

Location 360

Insights into safety & exposure metrics for each location

Staff & Student 360

Insights into staff & student wellbeing through ongoing metrics

Safe2Learn

Risk score based on AI recommendation for university operations

Measuring Outcomes

KPIs for on-campus housing, classrooms and much more

Monitoring

Insights into safety violations powered by real-time analytics

Learn how Wellness AI can enable granular decision making for administrators, parents & students.
